

## **SCIGRIP's MMA experts to host specialist consultation sessions at JEC World 2016**

**17<sup>th</sup> February 2016, Washington, UK (JEC World Stand Hall 6, L81)** – SCIGRIP, a global supplier of smarter adhesive solutions, will be offering one to one consultations at JEC World from the 8<sup>th</sup>-10<sup>th</sup> March 2016. The MMA Team comprises of SCIGRIP adhesive experts who will be available to answer bonding queries and offer guidance around the application of 10:1 and 1:1 MMA technologies to a variety of substrates.

The SCIGRIP MMA team invites all JEC visitors with any bonding challenge to attend a consultation session with the relevant member of its highly experienced team. Each session will be entirely confidential.

Involving SCIGRIP in the early phases of the design process, greatly reduces the possibility of bonding failures and subsequent delays to customer's project.

John Reeves, SCIGRIP's President, explains.

"Working in partnership with our clients from the outset of any bonding application allows us to identify any constraints or stresses and assess the environmental conditions the component may be exposed to. With this information and level of involvement we can specify the appropriate strength 10:1 or 1:1 MMA system to deliver the most successful and reliable results".

SCIGRIP's range of MMA Technologies are suitable for a variety of composite, plastic and metal bonding applications in the automotive, agricultural vehicle and marine industries.

Product highlights at JEC World 2016 will also include:

SG800 – An ideal panel bonding range that demonstrates excellent environmental endurance and increased thermal resistance of temperatures above 120°C.

SG300 – An excellent choice for bonding metals, metals to plastics and metals to composites, reducing the need for mechanical fasteners.

SG230 – A two component, 10:1 mix ratio product for bonding composite and other plastic parts with little or no surface preparation required.

In addition to the consultation sessions, SCIGRIP will also present a digital overview of their technologies alongside the publication of an 'Introduction to MMA's' white paper.

Full details on the MMA team members can be found via [www.scigrip.com](http://www.scigrip.com) or on the Scigrip Adhesives Linked In page. Alternatively, enquirers can arrange a meeting through [mark.rogan@scigrip.com](mailto:mark.rogan@scigrip.com).

### **The MMA Team**

#### **Rod Fleming**

Director of Sales and Marketing-Americas

With over 20 years of experience as a technical sales engineer and manager of sales and marketing, Rod has worked with a variety of manufacturers with the global composites industry. Formerly with Interplastic Corporation, Fiberglass Industries, and Colbond, Rod has extensive experience with resins, reinforcements, and vacuum infusion products. Rod manages a team of highly skilled sales managers determined to provide industry leading technical sales support and service.

Specialty areas: Adhesives, Resins, Reinforcements, and Vacuum Infusion related processes and products.

To book a consultation with Rod, please email [rod.fleming@scigrip.com](mailto:rod.fleming@scigrip.com)

---

#### **Manny Tesfaye**

Director of Global Technical Services

With over 30 years of experience as a senior engineer within the world of structural adhesives and designing with advanced composite materials, Manny has previously worked for for Owens Corning Fiberglass, DuPont, Reichhold Inc and currently IPS and Scigrip.

A true expert in the world of MMA's and structural adhesives, Manny manages and works with highly skilled team of chemists and technicians to develop and implement patentable products with measurable advantages for demanding applications.

Specialty areas: Adhesives, Resins, Reinforcements, Closed and Open Mold production, Boat Building, Laminate design and analysis.

To book a consultation with Manny please email: [manny.tesfaye@scigrip.com](mailto:manny.tesfaye@scigrip.com)

---

John Pacanovsky

Global Director of Development

With over 20 years of experience as a polymer scientist within the world of structural adhesives and composite materials, John has previously worked for Reichhold and Henkel before starting Triangle Polymer Technologies; a general defense contractor for the US Military specializing in Advanced Materials Development and currently IPS and Scigrip.

John leads a global team of highly skilled team of chemists and technicians to develop and implement patentable products with measurable advantages for demanding applications.

Specialty areas: Adhesives, Composites, Bus, Truck, Rail and Automotive Markets and Applications, Wind Energy

To book a consultation with John please email: [john.pacanovsky@scigrip.com](mailto:john.pacanovsky@scigrip.com)

---

Mark Rogan

European Sales and Marketing Manager

With over 27 years of experience in Engineering with 18 of those Years working within the structural adhesives, Sealants and Coatings industries having worked for Loctite, Sika, Belzona, Henkel and now Scigrip Europe. Whilst working for these global organisations gaining extensive experience with a vast array of markets such as Automotive, Bus Truck and Rail, Military, Utilities, Petro Chemical and Oil and Gas to name only a few.

Mark leads a team of motivate sales and customer service people covering Europe and further afield. Driving the development of partnerships and distributors across all regions

Speciality Area. Structural adhesives, production processes, development, design and adhesive specification. Transportation, Automotive and Special Vehicle.

To book a consultation with Mark please email: [mark.rogan@scigrip.com](mailto:mark.rogan@scigrip.com)

---

Tim Johnson

UK/Ireland/Benelux Key Account/New Business Development Manager

An adhesives professional with over 20 years' experience with Axson, Bostik and now Scigrip as an Adhesives Engineer, Key Account Manager & European Sales Manager.

Tim has experience of rapid prototyping & laminating resins, along with water based, solvent based, MS Polymer, Body-in-white and structural methacrylate adhesives.
